

Always give NOTICE!

If you get hurt on the job, always report your injury to the boss. And if you miss work because of the injury, make sure that a report is filled out and filed with the Department of Workers Claims.

You may be pressured not to report an injury. You might even be told to lie about how it happened. The boss may tell you that if you report your injury it will, "hurt our safety numbers". The boss may promise to, "take care of you" and pay any medical bills and lost wages out of his pocket. Do not believe it. You must report your injury. If you don't, you may completely lose your rights to claim benefits.

If this scenario happens to you, call us and we'll talk to you about it for free.
